

To whom it may concern,

I have known Gay Brown for 8 years and both my children have been tutored by her and I have found both have very much benefited from the one on one attention that they get from Gay.

She has always helped them with what they are needing at the time and can read the children well. I have two children that are very different and both have learning problems that Gay has helped them with.

It is always hard enough when you child has a learning difficulty and trying to get them to do extra studies is always difficult.

But both my children have always enjoyed their time with Gay and are happy to see her and do what she asks them to do, even when they are tired and have to travel about 30 minutes to see her.

Thank you for all your help and I am sure all your hard work with my children has and will help them throughout their lives.

Kind regards

Tara and Macca Mucciarone
